

# Rain & Grey-water Harvesting Systems

**CPM Environmental** has developed a series of **Off-Site Solutions** products for Rainwater Harvesting & Grey-water recycling systems - **Oasis** which are available for Garden, Domestic, Schools & Commercial Developments

**System Benefits:**

- Extensive range of standard & bespoke storage capacities - system capacity starts at 1500L
- Range of Water Management systems available: Rainmanager, Header Tank or Control Panel.
- Various filter system options available for Domestic & Commercial developments up to 20,000m<sup>2</sup>.
- Grey-water Recycling Technology which complies with EU Bathing Regulations
- Tank/Soak-away option available.
- Rainwater/Grey-water combined system.
- The Oasis chamber & pipe systems are Kite-marked to BS EN 1916/1917: 2002.
- Can be installed in trafficked areas, chamber supplied with standard HD Cover Slab.
- Speedy installation-chamber can be installed within the hours, requires no in-situ concrete base or granular backfill.
- Floatation is not a problem & does not require to be filled with water when back filling unlike some tank materials.
- The Oasis chamber also benefits from a 120 year design life.
